

Reconstruction of unknown birthtime

The only reliable factor as yet, at 12h noon, is the position of the sun(SU). Therefore, the SU-Houses are applicable. It shows that the Transit-Moon one day earlier, on 7th April 1983 is in SU 4/3, connecting to the mother's SU (1), on 85°02 / 25°02 Gemini.

The SU of the father on 327°26 / 27°26 Aquarius, (2) connects to SUt on the day of conception.

It also connects to Venus and Uranus radix, showing VE/URt - procreation, and VE/MAt - family, sexual intercourse, in SUr house 7/12.

As the Moon(MO) transit would go forward in time, the equation

Aries(AR)/MOt = AR/MO_r would arise. More important is the position of MOt as it is passing over the Ascendent(AS) or DC on the day of conception.

The AS would then be in SU-house 10, reflecting 10/9 where there is the SU of the mother, while MCt or AS_t must be on the axis found then.

At 18h51m27s on Jan., 8., 1984

AR+SU-MC 264°51 / 17°21'01"
equals AS/AR 62°21 / 17°21'01"
value in 22°30

- 1) For the Sun Signs Sg, Cp, Ge and Cn the code or key is AR+SU-MC = AS/AR which is the case here.
- 2) MOt is crossing the DC on 6.4.83
- 3) and MCt is on the axis.

The AS connects to the mother's SU,
the MC to the father's SU,
~ MC/AS - social surrounding;
SU father/ VE, UR,
~ VE/UR - procreation;

= MA/JU AS/ SA MO/ SA
MA/JU=SA - end of pregnancy;
Schwangerschaftsende; Geburten;

Verification of rectified time

On August 13, 2004 the death of his mother occurred, in Paris, where she had been for cancer treatment.

The Solar Arc directed Admetos(ADd) is on its way to Hades(HAr). Thus the HA^AD-axis is activated i.e. relevant.

HA^AD = AR/HA HA/SU mother(1)
